

OUTLINE RELATIONSHIPS AND COORDINATION IN MINE ACTION

ANNEX C

The diagram depicts the general responsibilities for mine action in Lebanon and the inter-relationships between the various actors: The Government of Lebanon has overall responsibility and exercises this through a central coordinating authority, NDO. The Lebanese Army, utilising the skills of the Army engineers conducts the physical clearance activities as well as Mine Awareness in conjunction with the NDO and NGOs. The UN System supports the Government and the NDO through its various agencies and coordinates with Donors through the International Support Group (ISG). The TWG provides a mechanism to develop acceptable standards and procedures among the various operational actors in the functional fields.
